**RInfra's 4th road project goes operational
Commences operations for six-laning of road connecting Bengaluru –Chennai, part of
Golden Quadrilateral**

BOT project with a concession period of 24 years

RInfra's road portfolio is currently worth Rs.12,000 crore, with 11 projects of 1000 Kms

Mumbai, June 8, 2011: Reliance Infrastructure Limited (RInfra) commences operations on its 4th road project connecting Bengaluru and Chennai, part of Golden Quadrilateral. The toll collections and widening operations from 4 to 6 lanes, started from Tuesday June 8, 2011.

The project road is a section of the National Highway - 7 (NH-7) between Hosur and Krishnagiri, which connects Bengaluru and Chennai. The project is being executed on Build Operate Transfer basis and has a concession period of 24 years. The project is awarded to RInfra by NHA under the competitive bidding process.

Traffic Volume Count (TVC) at proposed toll plaza locations suggests average annual daily traffic (AADT) of around 52,000 PCU's. The new 6 lanes corridor will be able to manage increased capacity of 72,000 vehicles, once widening is complete. The expansion of the road from 4 to 6 lanes, once completed will additionally ease the current traffic conditions, reduce traveling time and increase driving comfort with 24X7 facilities.

R-Infra will use state-of-the-art Advanced Toll Management Services (ATMS) at the toll plazas to automate tolling and streamline the toll collection. Highway Toll Management System (HTMS) used on the project site will provide CCTVs, speed detectors and other services to monitor traffic flow on the road.

RInfra will introduce Medical, First Aid, Vehicle Rescue Post and Patrolling services at the toll plazas. Road furniture including road signs, pavement markings, crash barriers, delineators that will enhance safety for the users will also be included.

Commenting on this development, RInfra's spokesperson, said, "Our road projects are *conceived to push the country's economic engine. The new developments in the project will bring vibrancy and growth in the present industrial sector and boost the economy of the region. In addition, our focus is to ensure better customer experience with enhanced safety.*

Reliance Infrastructure Limited

Reliance Infrastructure Ltd (RInfra) is the largest infrastructure company developing projects, through various Special Purpose Vehicles; in several high growth areas in Infrastructure sector i.e. Roads, Metro rail, Airports, etc. The Company is also leading utility company having presence across the value chain of power businesses i.e. Generation, Transmission, Distribution, EPC and Trading.
